Education

University of Ottawa   Sept. 2017 to June 2022
BASc. Computer Engineering
GPA: 3.9/4.0

Experience

SnapCommerce   Toronto, ON
Software Engineer Intern   Sept. 2021 to Dec. 2021
- Currently working for the product engineering team for Fall 2021

Mercari   Tokyo, Japan
Frontend Developer Intern   June 2021 to Aug. 2021
- Collaborated with product designers and various teams to implement designs and features that will be used by 10+ million people across Japan
- Investigated and implemented maintenance mode and related features for various shipping methods used by the Mercari app to ensure continuous smooth shipping flow when one is unavailable
- Worked with the frontend team to enhance, optimize, and fix related bugs for UI/UX on the app using **React** and **Gatsby**

University of Ottawa   Ottawa, ON
Full-Stack Developer Intern   Sept. 2020 to Apr. 2021
- Enhanced UI/UX for the engineering outreach platform through bug fixes and features implementation in Angular
- Assisted in overhauling the platform's authentication and identity management system, used by 500+ users, to enable multifactor authentication, migrate users from the legacy system, improve account management, and integrate staff management features.
- Architected and designed program management features for administrators to manage events, workshops, and activities, and their statuses
- Developed and improved APIs across the product application using **Java**, **Maven**, and **PostgreSQL**

OpenText   Montreal, QC
Software Engineer Intern   Jan. 2020 to Apr. 2020
- Designed and architected frontend components and features in **Java** to further enhance enterprise product's UX for up to 1000+ business itineraries for 50+ businesses
- Helped save $1000+ through building and automating backend solutions in **PHP** for scanning code reviews to help certify projects are following PCI compliance standards

Mitel   Ottawa, ON
Software Developer Intern   May 2019 to Aug. 2019
- Utilized **TypeScript**, **AWS**, and **DynamoDB** to develop REST APIs used by various internal development teams to help with efficient internal automation testing resources management
